For your review and consideration, we are providing a proposal for services requested as described for your.

Generac 500KW Model: 12328390800 Serial Number: 2108260

DESCRIPTION

Coordination must be done with C,G&J to be on site the day the Radiator is being removed so they can transport it to their shop for repair.

Day #1: Drain Coolant and remove all parts needed to pull radiator. Remove the housing Panel above the radiator to allow removal of radiator. Boom Truck will be supplied and operated by Customer. Install lifting eye bolts on top of radiator and have boom truck remove the radiator assembly. Place the assembly on C,G&J Truck or Trailer. Re-Install the Generator Housing roof Panel to prevent rain from entering the housing. After Repair and E-Coating, C,G&J must Coordinate with us to be onsite to re-Install the radiator. Day #2: Lift the radiator back into the generator with the Boom truck. Reconnect all removed components and refill the cooling system. Run the generator to operating temperature to verify there are no coolant leaks.
