<tr>
<td>Staff requests authorization to continue one of several site restoration phases called for in the Conservation Park management plan. The upland areas in the park historically consisted of a scattered longleaf pine forest with grass lands, but the practices of tree farming and fire suppression had dramatically altered the site. Most of the commercially planted slash pine trees have been removed from upland areas during the past 5 years to allow space for native longleaf pines. To date, approximately 570 acres on site have been replanted with 146,000 longleaf seedlings. 44,000 wiregrass seedlings have also been planted in 16 acres scattered in the park.</td>
</tr>
<tr>
<td>The next phase of the restoration plan is to plant another 318 acres with longleaf seedlings and 40 acres with wiregrass seedlings in February 2017. Due to high demand for these seedlings, and limited availability, orders typically need to be placed as early as possible to be able to obtain the needed quantities.</td>
</tr>
<tr>
<td>The most cost effective source for the City to obtain the desired quantity is to purchase directly from the State of Florida through its Andrews Nursery near Chiefland. An order form in the total amount of $45,050 for the required seedlings is attached for your review. Payment is required at the time orders are placed, and if delivery cannot be made, the state would refund the City's money. Staff intends to use specialized contract labor to hand plant the seedlings after preparatory prescribed burns are completed. Labor for planting will be bid this fall and that additional cost is estimated to be approximately $45,000 to $50,000. Staff recommends approval of the purchase and funds are in the current wastewater system budget.</td>
